Zzapp IRS App

Zzapp malaria introduces innovative technologies to the world of malaria intervention, that help overcome operational challenges.

Our mobile House Spraying App replaces paperwork and arduous monitoring with a friendly, easy-to-use digital interface that will help workers and managers ensure 100% coverage of all houses.

The app assigns the worker addresses and routes to follow, and keeps track of the worker's progress. Using our app, the worker can report the outcome in each house sprayed, including number of rooms, presence of family members, refusal etc. The app collects the data and transfers it automatically to the management Dashboard.

The IRS app was field tested in Obuasi, Ghana, with excellent results.

- Clear interactive map and satellite image
- Operates without constant connectivity
- Seamless data transfer to Dashboard
- Follows WHO's guidelines
